

COMPLETE
ACCURATE
AGENTLESS
SECURE

SITEAUDIT COMPACT - EASIEST WAY TO ASSESS YOUR PRINT ENVIRONMENT.

Netaphor
SiteAudit
Compact

SiteAudit Compact is managed print software for performing remote assessments. It is completely secure and easy to operate. Just download SiteAudit Compact and run it. No software is installed and it collects data from all printer manufacturers and models; it even collects information about local printers without requiring desktop agents.

>01 Requires No Installation

SiteAudit Compact offers zero-touch installation. Organizations simply visit the Compact web site, enter their credentials for authentication, download the application, configure discovery and run it. Once the data collection period is over, just close it; there is nothing to remove.

>02 Local and Network Printer Data

Data collected from network printers includes color, B/W, copy, print, scan, fax and up to 19 separate counters. Local printer data is collected for the monitoring period and does not require installation of desktop agents. Data about consumables levels, coverage is also available.

>03 Remote Snapshot Assessment

SiteAudit Compact is used to take environmental snapshots. Data from these collections produce fresh and accurate measures of inventory, print volume and consumable levels. These snapshots make possible the perfect analysis for reducing costs and right-sizing the fleet.

ASSESSMENT MEASURES

- ✓ PRINT VOLUMES
- ✓ CONSUMABLES
- ✓ LOCAL PRINTERS
- ✓ NETWORK PRINTERS

SITEAUDIT COMPACT

"SiteAudit Compact was so easy to use and reduced our installation costs to almost nothing. It won quick IT approval! We collected all the critical data so our inventory and volume assessment was complete and accurate."

- Operations Manager, Leading Print Manufacturer

RAPID ASSESSMENTS OVER the INTERNET

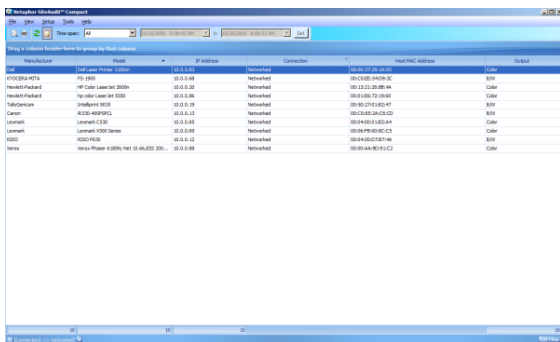

An assessment that is both rapid and remote, that collects all the critical data necessary to inform you about the printer environment. No worries about lengthy IT approval cycles or scheduling visits to install assessment keys. It is all done securely over the Internet with **SiteAudit Compact**.

» Assessment Requirements

SiteAudit Compact is the downloaded application and collects printer data to the Netaphor hosted site. It has been design to achieve optimal performance in environments with less than 250 printers. Assessment site requirements are simple, a Windows machine with NET Framework 3.5 SP1.

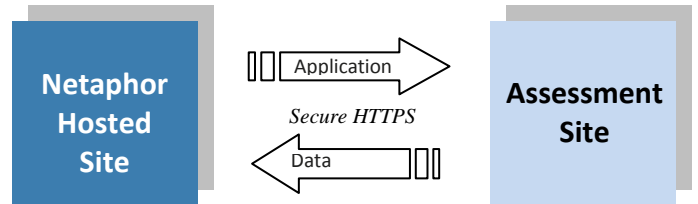

» What The Assessment Site Sees

Once the data collection has started the user only sees the Inventory view. They can right click on a specific printer to see print volume and consumable details only.

SiteAudit Compact – Inventory view

» Secure Transmission and Data Storage

SiteAudit Compact utilizes HTTPS, a secure mechanism to protect payment transactions and corporate information systems. Data integrity is maintained through authentication and firewall protection--the same mechanisms that protect Netaphor's own data.

» Assessment Analysis and Reporting

Make the analysis in SiteAudit then generate easy-to-read reports that support the analysis. Or export the data into popular formats including csv, xls, html and others so that data can be repurposed.

» Using SiteAudit Installed Version

Comprehensive assessments that analyze user and service performance can be made with the installed version of SiteAudit. Ask about it.
